

S-Chelate Plant Nutrition
Biologically Friendly Chelates

For Use with Organic Crops

PRODUCT DATA SHEET

S-Chelate-O B **Water Soluble Powder**

Water Soluble Boron (B) 20% minimum

This is the level of Boron quoted as an element not as an oxide or any other compound

Application Rate: 100-400grams/Ha in 200 litres of water

**BIOLOGICALLY FRIENDLY ENOUGH TO BE
SOIL ASSOCIATION APPROVED FOR USE WITH
ORGANIC CROPS
WHEN THERE IS A KNOWN DEFICIENCY**

PHYSICAL PROPERTIES

Water soluble Boron micronutrient powder

pH of 1% solution in water - 8.5

Particle Size - 95% < 75 microns

Appearance - Fine White powder

Bulk Density - 0.35-0.6g/cm³

Odour - slight odour

Packing: 5kg PE lined steel pails

S-Chelate™ technology
Chemistry not Mystery
Made in the UK

23rd June 2021

Align Chemical Limited, Registered in England and Wales, no 6335052
Registered Office: 29 Milton Lawns, Amersham, Bucks, HP6 6BJ
UK VAT registration number: 913 4463 37

GENERAL GUIDANCE FOR USE OF THIS PRODUCT

Please carry out soil and tissue tests to guide your use of this product.

Liebig's barrel reminds us that plant growth will be limited by a deficit of any one of the elements essential to growth.

It may be that your plants would benefit from one of our multiple element combinations. S-Chelate chelation technology has been developed to enable each mineral cation to be highly biologically available and biologically friendly.

Please see our website www.s-chelate.com for how we measure the wide bioavailable pH ranges and examples of plants that have benefitted.
